

YAMAHA 125 MOTOCROSS

AT1-M

A lightweight Motocross machine featuring outstanding performance. Even the roughest, wildest terrain yields to the power of the tough 5-port single cylinder engine of the AT1M. Primary kick starting in any gear for extra convenience. Authentic 5-speed transmission operates extra smoothly for super-fine changes at any speed. Extra-high ground clearance with skid plate for complete protection from damage on any terrain. Yamaha's exclusive race-proven Autolube oil injection system keeps engine performance smooth. Double cradle frame design. The toughest light weight of the Motocross class.

YAMAHA 250 MOTOCROSS **DT1-M**

This big 250 has all of the guts to get across the roughest country with all the ease of cruising down the turnpike. Built to take the shock and punishment like no other machine its size. Famous 5-port engine delivers exciting power under all conditions. Flat, powerful torque for unequalled GO power. New tapped head and plug for compression release. Special long-stroke front forks engineered to take all the bounce and shock of cross-country riding. Super-smooth, wide-ratio 5-speed transmission works with amazing ease in any speed range. A machine unequalled in its class.

YAMAHA 360 MOTOCROSS RT1-M

This husky machine has a frame design which will withstand all of the brute power and punishment of the Motocross and stand ready for more. The amazingly powerful short-stroke engine makes the roughest terrain seem like a Sunday ride. The smooth 5-speed transmission and incomparable handling ease make this machine a beauty to operate. Special non-slip knobby tires for superior traction. And, even on the wildest terrain, the front fork and rear suspension make the riding almost as comfortable as the smoothest highway.
